《魅上海（英文版）》内容简介：The stunning city of Shanghai has a rich and varied history and nowhere is this better reflected than in its amazing architecture. All across the city, the buildings tell a story whether it's the culture of the old folk houses, the grandeur of the 1920's towers when Shanghai boasted the Number One city in the Far East, or the thriving modern towers now driving economic growth. It's the sensitive blend of history, culture and the contemporary that make Shanghai a world class metropolis today.

This souvenir edition celebrates the splendour of Shanghai. Six spectacular pop-ups, all technically accurate, reflect the variety of the city:

Yu Garden with its 400 years' history has a strong flavour of old Shanghai

Nanjing Road where trade has flourished since the 1920's.

The Bund with its grand towering buildings combining styles from across the world.
Xintiandi scenically beautiful reflects the historical and cultural features of the city.
Jinmao Tower symbolises the confident, modern nature of the city.
China Pavillion Shanghai's newest building represents all the hope for the future.
