Larry Feldman desperately needed a kidney. After two god-awful years on dialysis, watching his life ebb away while waiting on a transplant list behind 74,000 other Americans, the gun-toting couch potato decided to risk everything and travel to China, the controversial kingdom of organ transplants. But Larry urgently needed his cousin Daniel's help...even though they had been on the outs with each other for years. So begins the quest of two star-crossed cousins to rejuvenate Larry's failing body and ever-romantic heart, while avoiding getting tossed into a Chinese slammer.
