The world is in chaos. A zombie plague has devoured every nation on the planet. New York City is no exception. Imagine eight million zombies. Shoulder to shoulder. Walking the streets, looking for their next meal. The residents of one apartment building have bonded to keep themselves safe from the onslaught, but their inevitable demise lurks right outside their window, a constant reminder of the doom that awaits them. Forced to remain in the safety of the building, the tenants find themselves at each others' throats. When they spy a lone teenage girl who walks among the hordes, unattacked by the undead, their world opens up.
