"Orthopaedics and Rheumatology In Focus" is aimed at all medical and health science students who require an introductory, low cost and highly illustrated guide to this specialty. The material is presented in double page spreads. The left-hand page has a synoptic and highly structured text (normally under the following headings: incidence; clinical features; differential diagnosis; management; prognosis). The right-hand page has a selection of four to six clinical photographs. "Orthopaedics and Rheumatology In Focus" is pocket sized and therefore ideal for quick preparation before ward rounds. The volume also includes self-assessment material, which is extremely helpful for preparation for examinations.
