"The Earth and Its Peoples, International Edition" presents world history in a balanced, global framework, shifting the focus away from political centers of power. This truly global text for the world history survey course employs a fundamental theme - the interaction of human beings and the environment - to compare different times, places, and societies. Special emphasis is given to technology (in its broadest sense) and how technological development underlies all human activity. Highly acclaimed in their fields of study, the authors bring a wide array of expertise to the program. There is a combination of strong scholarship and detailed pedagogy that gives the book its reputation for rigor and student accessibility. The fifth edition features new pedagogy and a beautiful new design.

评论

这本书比Leften Stavros Stavrianos教授的全球通史更详细，也是按照年代来说全世界发展史的，结合《A Global History: From Prehistory to the 21st Century》一起看比较有用。
