In a future world where the dead have risen and are attacking the living, the Church of Real Truth has replaced the government, and has sworn to reimburse those citizens who have been attacked by the undead. Chess Putnam, a fully-tattooed witch, freewheeling Debunker, and ghost hunter, works for the Church of Real Truth investigating claims of hauntings. But meanwhile her drug habit has left her owing a dangerous drug lord who insists that she settle the score by dispatching a very nasty species of undead from an old airport. But the job involves black magic, human sacrifice, a nefarious demonic creature, and crossing swords with enough wicked energy to wipe out a city of souls. Toss in lust for a rival gang leader and a dangerous attraction to Bump's ruthless enforcer, and Chess begins to wonder if the rush is really worth it. Hell, yeah.

Unholy Ghosts , the first of Stacia Kane's new Chess Putnam series, is a cross between 'Ghostbusters' and 'Escape from New York', featuring punk rock, black magic, greasers, drugs, human sacrifices, and a black 1969 Chevelle.
