作者介绍:

目录: TABLE OF CONTENTS

Preface	vii
INTRODUCTION	
Chapter I: KNOWLEDGE, ACTION, AND EVALUATION	
1. To know is to apprehend the future as qualified by values which action may realize	3
2. The meaning of 'action'	5
3. The meaning of 'knowledge'	9
4. Knowledge and meaning	11
5. Only an active being could have knowledge	16
6. Empirical knowledge predicts experience as consequence of action	21
Chapter II: KNOWLEDGE, EXPERIENCE, AND MEANING	
1. The two types of knowledge	24
2. Usual requirements of knowledge	27
3. Three types of apprehension	29
BOOK I	
MEANING AND ANALYTIC TRUTH	
Chapter III: THE MODES OF MEANING	
1. The a priori and the analytic	35
2. Summary of theses in Book I	36
3. The four modes of the meaning of terms	38
4. The meaning of propositions and statements	48
5. Modes of propositional meaning	55
6. Propositional functions and statement functions	58
7. Intensional meaning and extensional meaning	65
Chapter IV: MEANING AND LANGUAGE	
1. Broader aspects of meaning	71
2. Symbols and expressions	73
3. Elementary and complex expressions	78
4. All words have meaning	79
5. Analytic meaning	83
6. Synonymous expressions	85
7. Holophrastic meaning and analytic meaning	87
8. Implicitly analytic and explicitly analytic statements	89
9. Analytic statements impose no restrictions on the actual ..	93
Chapter V: DEFINITIONS, FORMAL STATEMENTS, AND LOGIC	
1. The conventionalist view	96
2. Types of definitive statement	97
3. Symbolic conventions, dictionary definitions, and explicative statements	99
4. Quoted constituents in expressions	101
5. Figurative expressions and literal equivalents	102
6. The three senses of 'definition'	105
7. Equivalence by convention and equivalence of meaning	107
8. Definitions and formal rules	111
9. Formal statements	113
10. Formal statements and logic	115

11. A simple example	116
12. A second example	119
13. All truths of logic are analytic formal statements	122
14. Not all analytic statements belong to logic	124
Chapter VI: LINGUISTIC MEANING AND SENSE MEANING	
1. Two aspects of intensional meaning	131
2. Requirements of sense meaning	134
3. Sense meaning as criterion of application	136
4. Meaning as linguistically determined	138
5. Linguistic meaning and the analytic	140
6. Linguistic meaning and communication	143
7. The priority of sense meaning	145
8. Linguistic conventions	149
9. Sense meaning and the analytic	151
10. Analytic truth as relations of criteria	152
11. Entailment and incompatibility amongst sense-recognizable characters	154
12. Three factors in determining analytic truth	155
13. The question of the synthetic a priori	158
14. The analytic and the formally derivable	163
BOOK II	
EMPIRICAL KNOWLEDGE	
Chapter VII: THE BASES OF EMPIRICAL KNOWLEDGE	
1. Enlpirical truth can be known only through presentations of sense	171
2. Knowledge by direct perception	172
3. The implications of an objective empirical belief	175
4. Expressive language	178
5. Three classes of empirical statements	182
6. Presentational certainties and objective probabilities	185
7. The given and its interpretation	188
8. Confirmations of non-terminating judgments	190
9. The operational conception of meaning	195
10. Knowledge of the past	197
11. Pragmatism and ubjectivism	200
Chapter VIII: TERMINATING JUDGMENTS AND OBJECTIVE BELIEFS	
1. The general character of terminating judgments	203
2. Terminating judgments are hypothetical	205
3. Terminating judgments and alternatives of action	207
4. The 'if-then' relation in terminating judgments	211
5. This relation is not that of strict implication	212
6. This relation is not that of material implication	213
7. This relation is not that of formal implication	217
8. The implicit generality of terminating judgments	219
9. Terminating judgments and contrary-to-fact hypotheses	220
10. Terminating judgments and the independence of the real	223
11. Terminating judgments and 'real connections'	226
12. Further problems	230
13. Objective beliefs are not decisively falsifiable	233
14. Confirmation and disconfirmatin of objective beliefs	235
15. Supposed further conditions of the test of truth	242
16. Objective beliefs are probable only	246
17. Summary with respect to critical points	247

Chapter IX: THE JUSTIFICATION OF EMPIRICAL BELIEFS

1. Verification and justification	254
2. Justification and foresight	256
3. Credibility and truth	257
4. Empirical knowledge is unverified	258
5. Past experience and validity	259
6. The complexity of empirical knowledge	261
7. Inference from particulars to particulars	262
8. Two further considerations	263

Chapter X: PROBABILITY

1. Probability and induction	265
2. Theories of the a priori type	266
3. Theories of the empirical type	269
4. Fundamental requirements of an empirical theory	276
5. Basic differences of the two types of theory	279
6. Difficulties of the empirical type of theory	282
7. A probability is a valid estimate of a frequency	290
8. Reliability of a probability determination	292
9. Three factors of reliability	298
10. Summary statement	303
11. The Principle of Indifference	306

Chapter XI: PROBABLE KNOWLEDGE, AND THE VALIDITY OF MEMORY

1. Justified belief is belief which is probable	315
2. Empirical knowledge as belief in what is probable	316
3. Can such belief have grounds which are sufficient?	325
4. The problem of the validation of memory	327
5. The epistemological present	328
6. The threatened regressus of beliefs	332
7. Coherence and congruence	338
8. Congruence and the logic of induction	343
9. Congruence by itself is not sufficient to validate belief	349
10. Congruence and memory	353
11. 'Deduction' of the basic validity of memory and of induction	356

BOOK III

VALUATION

Chapter XII: KNOWING, DOING, AND VALUING

1. Valuations are a form of empirical knowledge	365
2. Action and valuation	366
3. Practical justification of action	370
4. The cognitive content of valuations	371
5. Types of value-apprehension	373
6. A priori value-predications are not valuations	378
7. Objective value and immediate value	380
8. Intrinsic value, instrumental value, and utility	382
9. Values in objects are extrinsic	388
10. Inherent values	390
11. Summary as to terminology	392
12. Further explanatory remarks	393

Chapter XIII: THE IMMEDIATELY VALUABLE

1. Values immediately realized are intrinsic	397
2. Naturalism in value-theory	398
3. The problem of characterizing the immediately valuable	400

4. Value-disvalue as a mode of presentation	401
5. 'Pleasure' a poor name for the immediately valuable	403
6. Is value in direct experience subjective?	406
7. Imnlediate value as a quality of appearance	406
8. All value in objects is extrinsic	411
9. Value in objects is potentiality for some realization of value in immediate experlence	413
10. Subjectivity of value as relativity to what is personal	414
11. Are value-qualities more subjective than sense qualities?	418
12. Subjective value-apprehension and error in value-judgment.	419
13. Immediate value as attaching to presentation	424
14. Immediate value as affected by the context of the presentation	425
15. An example	427
Chapter XIV: INHERENT VALUE AND THE ESTHETIC	
1. Intrinsic value and inherent value	432
2. Esthetic values are a subclass of inherent values	434
3. The active, the cognitive, and the esthetic attitudes.....	437
4. The broad meaning of 'esthetic'	444
5. The narrower meaning of 'esthetic'	446
6. Interests subsidiary to the esthetic	450
7. Esthetic values and values found in activity	453
Chapter XV: ESTHETIC JUDGMENT	
1. Esthetic judgment concerns a property of objects	457
2. Comparative evaluations of the esthetic in experience	462
3. The esthetic character of experience may be judged	464
4. Esthetics and esthetic theory	466
5. Types of esthetic objects	469
6. The esthetic actuality and its context	472
7. The variety of things esthetically valued	476
Chapter XVI: THE MORAL SENSE AND CONTRIBUTORY VALUES	
1. Value-effects of one experience upon another	479
2. The imperative of rationality and the good life	480
3. Values contributory to the good life	486
4. Critique of the Benthamite calculus of values	488
5. Value in experiential wholes	495
6. The consummatory character of value in an active life	497
7. An implication for our relation to others	500
8. A life to be found good in the living of it	503
9. Synthetic apprehension of value in experiential wholes	505
10. Difficulties of such appraisals of value	507
11. Practical simplifications of the problem	509
Chapter XVII: VALUE IN OBJECTS	
1. Various modes of predicating value to objects	511
2. Value as simple potentiality	512
3. Value as relative to actual conditions	516
4. Value relative to persons	521
5. Absolute value and comparative value	524
6. Relative value and ethics	529
7. Value as relative to humans in general	531
8. Bare utility and instrumental value	533
9. Value-significance of names	534
10. Values as relative to control	537
11. Distinctive modes of evaluation	539

12. Social value	541
13. The assessment of social values	543
14. Social values and ethics	551
INDEX	557
