Lock On: Flaming Cliffs 2 is the next evolution of the Flaming Cliffs series. Flaming Cliffs 2 updates both the Lock On and Flaming Cliffs to include many new features. Some of these new features include:

Runs under DirectX 9C

Improved Mission Editor with trigger system

New terrain area to include much of Georgia. This will be same map as used in DCS: Black Shark. As such the Crimea has been replaced with the addition of Georgia.

More detailed terrain to include more ground objects, larger forests, and higher resolution elevation data

Improved clouds

High resolution airfield textures

Improved multiplayer system with embedded game browser

More robust online cheating prevention

New and improved menu system

Numerous new, highly detailed ground units including infantry

Improved flight performance for player-controlled aircraft

Improved flight models for all artificial intelligence (AI) controlled aircraft

New, more realistic G-tolerance modeling

Limited 6 DOF cockpits that move up, down and sideways according to maneuvering

New and highly-detailed Su-25 model

Advanced ballistics are implemented for all flyable aircraft, including ricochets of AP rounds

F-15C locked target IFF indication

More realistic ranges, seeker guidance and fuzes for air-to-air missiles

More realistic electronic countermeasure operation and performance

New and improved sound engine

New radio message voice-overs

In addition to these new features, Flaming Cliffs 2 will also be online compatible with DCS: Black Shark. This will allow both Black Shark and Flaming Cliffs 2 pilots to flight alongside each other or against each other in a common battlefield environment.

The rationale behind the release of Flaming Cliffs 2 is most deeply rooted in providing our customers an updated and greatly improved combat environment to enjoy the Lock On and Flaming Cliffs aircraft.
