The year is 2314. An age of man and machine never before seen. However, with new technology comes new crime. Enter Alex Ryan, your typical white-collar American by day. By night, however, he is known as Nightgrieve, a notorious hacker hailed as a ghost by the police. Desperate to catch him, a new artificial intelligence is tasked with his capture by any means required. But what secrets lie within the system, and why suddenly has the FBI taken such interest in the young hacker?
