In this stunning new book, Malcolm Gladwell takes us on an intellectual journey through the world of "outliers"--the best and the brightest, the most famous and the most successful. He asks the question: what makes high-achievers different? His answer is that we pay too much attention to what successful people are like, and too little attention to where they are from: that is, their culture, their family, their generation, and the idiosyncratic experiences of their upbringing. Along the way he explains the secrets of software billionaires, what it takes to be a great soccer player, why Asians are good at math, and what made the Beatles the greatest rock band.

Brilliant and entertaining, OUTLIERS is a landmark work that will simultaneously delight and illuminate.

去除神话，活个明白。

The amusing stories Gladwell provided made me reflect on my own struggle to succeed in life.

有些观点还是不错的 不过显得有些牵强。
“十年学会编程”那篇文章与之相似，不过更好点

Embrace the struggle.

简单易读，强烈推荐。

Meh. Some of the ideas are r/mildlyinteresting and insightful but some are just pure common knowledge sensationalized into obscure secrets of success.

成功有时是命中注定

MG真是不可多得的鬼才作者，永远穿梭在不同维度之间，带给你种种启发，牢牢抓住你的好奇心

One's success doesn't wholly depends on his/her intellectual level. It has to do with opportunities, one's readiness, and many other factors. Where one comes from actually plays some part in how successful he/she is. Nevertheless, one's personalities are crucial too, like persistence, and willing to work hard, etc. Good book, all in all.

I like the second half of the book about how cultural heritage conducts your behavior.
