装帧:Paperback

isbn:9780226102467

Cheney and Seyfarth enter the minds of vervet monkeys and other primates to explore the nature of primate intelligence and the evolution of cognition. "This reviewer had to be restrained from stopping people in the street to urge them to read it: They would learn something of the way science is done, something about how monkeys see their world, and something about themselves, the mental models they inhabit." Roger Lewin, Washington Post Book World "A fascinating intellectual odyssey and a superb summary of where science stands." Geoffrey Cowley, Newsweek "A once-in-the-history-of-science enterprise." Duane M. Rumbaugh, Quarterly Review of Biology

作者介绍:

Dorothy L. Cheney is professor of biology and Robert M. Seyfarth is professor of psychology at the University of Pennsylvania. They are the authors of "How Monkeys See the World," also published by the University of Chicago Press.

目录: Acknowledgments
