Architecture Beyond Environment

Advancing a new relationship between architecture and nature, Territory emphasises

the simultaneous production of architectural objects and the environment surrounding them. Conceptualised within a framework that draws from physical and human geographical thought, this title of Architectural Design examines the possibility of an architecture that actively produces its external, ecological conditions. The architecture here scans and modifies atmospheres, arboreal zones, geothermal exchange, magnetic fields, habitats and toxicities – enabling new and intense geographical patterns, effects and sensations within architectural and urban experience. Territory charts out a space, a territory, for architecture beyond conceptualisations of context or environment, understood as that stable setting which pre-exists the production of new things. Ultimately, it suggests a role for architecture as a strategy of environmental tinkering versus one of accommodation or balance with an external natural world.

## 评论

Territory少了一个y...A+D专讲“领地”在当代建筑学中的意义的。一点点生态，一点点德勒兹，一点点地理学。。。但是开篇Gissen（Forty的弟子）和结尾Picon（建筑史学家）的两篇文章颇有点意思。。。其它的项目，马马虎虎。

-----  
读的原因主要是有Antoine  
Picon的那篇文章。不过实在太短，不过瘾。其他人的作品文章，随便翻翻即可。
