出版者:Wiley

出版时间:September 2010

装帧:Paperback

isbn:9780470742273

Today the convergence of design, engineering and architectural technologies are breeding a new material practice in experimental architecture. In this pioneering publication, this important shift is fully defined as a highly dynamic synthesis of

emerging principles of spatial, structural and material ordering integrated through the application of materialization and fabrication technologies. Providing the foundations for a new theory of structuring in architecture, The New Structuralism has broad implications for the way we both conceive and undertake architectural design, as its impact starts to emanate not only across education internationally, but also through architectural research and practice.

评论

看了前兩章，主要講述的是 Design-Engineering 我的話應該叫 設計性工程學吧。

今年來越來越多的結構設計在一開始就參與到建築的概念設計中來，而且書中的項目中都起主要作用。結構設計于型的尋找，從而找到建築的方法。個人覺得這樣而言的“新結構主義”是從根本上與舊的結構主義有區別的。在50 60年代開始的結構主義是基於索緒爾的語言學，利用一種關於個體和整體的關係的方法論。現在書中說的這個比較顯淺。較多關於數字化設計的資料。
