“We need better approaches to understanding and managing software requirements, and Dean provides them in this book. He draws ideas from three very useful intellectual pools: classical management practices, Agile methods, and lean product development. By combining the strengths of these three approaches, he has produced

something that works better than any one in isolation.”

—From the Foreword by Don Reinertsen, President of Reinertsen & Associates; author of Managing the Design Factory; and leading expert on rapid product development

Effective requirements discovery and analysis is a critical best practice for serious application development. Until now, however, requirements and Agile methods have rarely coexisted peacefully. For many enterprises considering Agile approaches, the absence of effective and scalable Agile requirements processes has been a showstopper for agile adoption. In Agile Software Requirements, Dean Leffingwell shows exactly how to create effective requirements in Agile environments.

- * Part I presents the “big picture” of Agile requirements in the enterprise, and describes an overall process model for Agile requirements at the project team, program, and portfolio levels

- * Part II describes a simple and lightweight, yet comprehensive model that Agile project teams can use to manage requirements

- * Part III shows how to develop Agile requirements for complex systems that require the cooperation of multiple teams

- * Part IV guides enterprises in developing Agile requirements for ever-larger “systems of systems,” application suites, and product portfolios

This book will help you leverage the benefits of Agile without sacrificing the value of effective requirements discovery and analysis. You’ll find proven solutions you can apply right now—whether you’re a software developer or tester, executive, project/program manager, architect, or team leader.

去年杨MM推荐给我的书，终于看完了，还是比较系统的。书名其实叫lean software requirement更好。

原来作者曾经指导过诺基亚团队。难怪有些似曾相识。

书评

2018年，自己的变化还是不少。比如原来很少借书看，到了2018年，买的书摞成一摞，反倒是借来的书看得快一些。这是一些改变使然。首先有一些影响，然后去做，最后习惯了。现在也会坐在图书馆的椅子上静静地看看书，写一写书评，这是原来没有过的事情。就像是眼前这本书《敏捷...
