出版者:Saint Martin's Press Inc.

出版时间:2010-11-5

装帧:Hardcover

isbn:9780312611392

When Columbia professor Dickson Despommier set out to solve America's food, water, and energy crises, he didn't just think big - he thought up. Despommier's stroke of genius, *The Vertical Farm*, has excited scientists, architects, and politicians around the globe. These farms, grown inside skyscrapers, would provide solutions to many of the serious problems we currently face, including: allowing year-round crop production; providing food to areas currently lacking arable land; immunity to weather-related crop failure; re-use of water collected by de-humidification of the indoor environment; new employment opportunities; no use of pesticides, fertilizers, or herbicides; drastically reduced dependence on fossil fuels; no crop loss due to shipping or storage; no agricultural runoff; and, many more. Vertical farming can be located on abandoned city properties, creating new urban revenue streams. They will employ lots of skilled and unskilled labor. They can be run on wind, solar, tidal, and geothermal energy. They can be used to grow plants for pharmaceutical purposes or for converting gray water back into drinking water. In the tradition of the bestselling "*The World Without Us*", this is a totally original landmark work destined to become a classic. With stunning illustrations and clear and entertaining writing, this book will appeal to anyone concerned about America's future.

## 评论

Vertical Farming的founding

text，作者对于自然的理解着实可爱：一方面认为我们要让indoors的一切都处于完全可控的范围内，一方面认为我们要让自然会到它本来的样子，于是他的设想或许可以总结为一个完全仿照自然系统的极端可控与高科技的城市，和没有人烟/人为影响的非城市（都不是农村），以此形成和自然互相照顾的关系，简直是乌托邦中的乌托邦。这种文本怎么会是用来打分的呢？一定是用来做文本分析写论文的啊！
