Of the various types of abnormal sexual behavior, the most dangerous and bizarre is autoerotic asphyxiation, also known as asphyxiophilia, sexual hanging, sexual asphyxia, scarfing, breath control play, and terminal sex. Though at least one autoerotic asphyxiation death occurs in the United States each day, it is almost unknown as a distinctive psychopathological entity in forensic medicine and psychology. Dr. Sergey Sheleg and Dr. med. Edwin Ehrlich draw from their own research, as well as the work of others, to provide a comprehensive review of this problem. Bringing together information from a variety of disciplines, "Autoerotic Asphyxiation: Forensic, Medical, and Social Aspects" is a valuable resource for pathologists, criminal investigators, criminologists, coroners, physicians, attorneys, life insurance experts, and funeral directors, as well as parents and living AEA practitioners.
