For two-semester courses in Organic Chemistry taken primarily by science and pre-health majors. Organized around functional groups, Wade's text is known for its student-oriented approach--incorporating problem solving help, orientation features, and complete discussions of mechanisms. Wade explains concepts without taking the unnecessary short cuts that often lead to misconceptions. Wade's hallmark problem-solving approach includes unique strategies and hints to help students focus on the individual steps of each reaction and how they contribute to the overall reaction. Wade also employs the most pedagogically efficient method of mechanism boxes with its two-tiered approach: Mechanism and Key Mechanism Boxes. Because there are over 100 mechanisms boxed in every text, Wade delineates the 20 "Key" mechanisms that comprise nearly all of the mechanisms students will encounter. This means Wade goes one additional and important step in helping students identify and grapple with the smallest number of the most important concepts to understand.

MyLab或是Mastering系列是在线作业系统。Access Code Card是在线作业系统的访问码，是老师和学生课堂之外网络互动及交流的平台，个人是无法使用这个平台的。请读者注意您购买的这个ISBN是不带Access Code Card的。

## 评论

我非常喜欢这书里，有机反应Mechanism书写的style，我希望自己也能早日能用LaTeX实现这种style。
