In this multidisciplinary approach Pasi Väliaho draws from science and philosophy to offer a compelling study of how the medium of film has shaped our understanding of ourselves and the world around us. Väliaho examines key films from the early twentieth century, tracing the role that various arrangements of movement have played in the development of corporeality, perception, and modes of thought in cinematic modernity.

## 作者介绍:

Pasi Väliaho is a lecturer in film and screen studies at Goldsmiths College, University of London.
