The present volume is an exciting new collection of original essays by outstanding feminist theorists including Sally Haslanger, Marilyn Frye and Linda Alcoff. Feminist Metaphysics is the first collection of articles addressing metaphysical issues from a feminist perspective. The essays cover central feminist topics including: the ontology of sex and gender, persons, identity and subjectivity, and the relations among experience, ideology and reality. Many of the papers combine cutting-edge feminist theory with contemporary metaphysics and the philosophy of language. The volume is also distinctive in including articles representing both analytic and continental perspectives on metaphysics. The essays are philosophically sophisticated and are primarily intended for a professional audience of philosophers and feminist theorists.
