著者:Sanjit K. Mitra

出版者:McGraw Hill Higher Education

出版时间:1999-12-1

装帧:Paperback

isbn:9780071165921

"Digital Signal Processing Laboratory Using MATLAB" is intended for a computer-based DSP laboratory course that supplements a lecture course on Digital Signal Processing.

The book can be used either as a stand-alone text or in conjunction with Mitra's "Digital Signal Processing: A Computer-Based Approach". The book includes 11 laboratory exercises, with each exercise containing a number of projects to be carried out on a computer. The book assumes that the reader has no background in MATLAB and teaches the reader, through tested programs in the first half of the book, the basics of this powerful language in solving important problems in signal processing. In the second half of the book, the student is asked to write the necessary MATLAB programs to carry out the projects.
