出版时间:2011-2-14

装帧:Paperback

isbn:9780321416919

This is a rigorous and complete textbook for a first course on information retrieval from

the computer science perspective. It provides an up-to-date student oriented treatment of information retrieval including extensive coverage of new topics such as web retrieval, web crawling, open source search engines and user interfaces. From parsing to indexing, clustering to classification, retrieval to ranking, and user feedback to retrieval evaluation, all of the most important concepts are carefully introduced and exemplified. The contents and structure of the book have been carefully designed by the two main authors, with individual contributions coming from leading international authorities in the field, including Yoelle Maarek, Senior Director of Yahoo! Research Israel; Dulce Poncele'on IBM Research; and Malcolm Slaney, Yahoo Research USA. This completely reorganized, revised and enlarged second edition of Modern Information Retrieval contains many new chapters and double the number of pages and bibliographic references of the first edition, and a companion website www.mir2ed.org with teaching material. It will prove invaluable to students, professors, researchers, practitioners, and scholars of this fascinating field of information retrieval.

Lecturer's recommendation on IR issue, 匆匆扫过。

每章最后的推荐很v5

书评

虽然资料有些陈旧，特别对于发展迅猛的IR领域！但是对于我入门还是比较合适的，看过去没有什么特别难理解的！当然我看的是中译本，不是原版！现在建议看Introduction to Information Retrieval!
