出版时间:2011-11-1

装帧:Hardcover

isbn:9781402783609

Body art meets popular science in this elegant, mind-blowing collection, written by renowned science writer Carl Zimmer. This fascinating book showcases hundreds of eye-catching tattoos that pay tribute to various scientific disciplines, from evolutionary biology and neuroscience to mathematics and astrophysics and reveals the stories of the individuals who chose to inscribe their obsessions in their skin. Best of all, each tattoo provides a leaping-off point for bestselling essayist and lecturer Zimmer to reflect on the science in question, whether it's the importance of an image of Darwin's finches or the significance of the uranium atom inked into the chest of a young radiologist.

作者介绍:

Carl Zimmer is a journalist and lecturer on science writing at Yale University. His numerous critically praised books include *Parasite Rex*, which The L.A. Times called "capable of changing how we see the world"; and *Microcosm*, which The Boston Globe called, "superb...quietly revolutionary." He writes for countless publications, including The New York Times and Scientific American and regularly appears on radio and on TV.

评论

Geek is new sexy.

相比之下，文科生的专业没法可视化，要用来纹身简直很为难，想象一下做红楼梦的纹个十二金钗。

Geek們的紋身也是相當有范兒 讀此書還能夠一覽物理化學的經典與前沿知識
也是神了。

zimmer大神真高产 此书的实物版何太华丽！

tattoo~

将wave function排上档期？
