著者:William J. Mitsch

出版者:John Welly & Sons, Inc.

出版时间:1993

装帧:精装

isbn:9780471284376

Now Mitsch and Gosselink bring their classic book up to date with substantial new information and a streamlined text supplemented with a support web site. This new Fourth Edition maintains the authoritative quality of its predecessors while offering such revisions as:

Refocused coverage on the three main parts of the book: 1. An introduction to the extent, definitions, and general features of wetlands of the world; 2. Wetland science; and 3. Wetland management.

New chapter on climate change and wetlands that introduces the student to the roles that wetlands have in climate change and impact that climate change has on wetlands.

Increased international coverage, including wetlands of Mexico and Central America, the Congolian Swamp and Sine Saloum Delta of Africa, the Western Siberian Lowlands, the Mesopotamian Marshland restoration in Iraq, and the wetland parks of Asia such as Xixi National Wetland Park in eastern China and Gandau Nature Park in Taipei, Taiwan. This expanded coverage is illustrated with over 50 wetland photographs from around the world.

Several hundred new references for further reading, up-to-date data, and the latest research findings.

Over 35 new info boxes and sidebars provide essential background information to concepts being presented and case studies of wetland restoration and treatment in practice.

作者介绍:

William J. Mitsch is Distinguished Professor of Environment and Natural Resources and Director, Wilma H. Schiermeier Olentangy River Wetland Research Park, The Ohio State University. He was the winner in 2004, with Sven Jørgensen of Denmark, of the Stockholm Water Prize and, in 2007, the Society of Wetland Scientists Lifetime Achievement Award.

James G. Gosselink is Professor Emeritus at the Center for Coast and Environment at Louisiana State University. He was awarded the Society of Wetland Scientists Lifetime Achievement Award in 1998.

目录: 1. An introduction to the extent, definitions, and general features of wetlands of the world; 2. Wetland science; 3. Wetland management.
