著者:G. B. Kerferd

出版者:Cambridge University Press

出版时间:1981-9-30

装帧:Paperback

isbn:9780521283571

This book offers an introduction to the Sophists of fifth-century Athens and a new overall interpretation of their thought. Since Plato first animadverted on their activities, the Sophists have commonly been presented as little better than intellectual mountebanks - a picture which Professor Kerferd forcefully challenges here. Interpreting the evidence with care, he shows them to have been part of an exciting and historically crucial intellectual movement. At the centre of their teaching was a form of relativism, most famously expressed by Protagoras as 'Man is the measure of all things', and which they developed in a wide range of views - on knowledge and argument, virtue, government, society, and the gods. On all these subjects the Sophists did far more than simply provoke Plato to thought. Their contributions were substantial and serious; they inaugurated the debate on many central philosophical questions and decisively shifted the focus of philosophical attention from the cosmos to man.

评论

追寻柏拉图背后的智者，作者所谓的quasi-archeological reconstruction. 作者有着一种无比平和的语气，读着又让人肃然起敬。不过老爷爷对Protagoras的崇敬简直溢出纸面。再不过其中讲语言理论和relativism的几章，还是一样头疼，我觉得他写哲学方面的讨论有点不能讲清楚，尤其句式上的复杂度更是头大。

首翻翻到dissoi logoi，提醒本渣下下周报告……
