isbn:9781609139988

Thoroughly updated for its Fifth Edition, Lippincott's Illustrated Reviews: Biochemistry enables students to quickly review and assimilate large amounts of complex

information by utilizing powerful visual resources that deliver the focus and clarification needed to master difficult biochemical concepts. Its signature outline format, full-color illustrations, end-of-chapter summaries, and USMLE-style review questions make it one of the most user-friendly books in the field. New features include case studies for each chapter and expanded coverage of molecular biology. A companion website offers fully searchable online text and additional USMLE-style questions for students and an image bank for faculty.
