Over the last twenty years Barcelona has reached the apex of its public appeal, and the time has come for a critical evaluation of its recent past. Barcelona is an emblematic example of how a European and Mediterranean city can be radically transformed. Starting from the 1980s, through investment in contemporary architecture, tourism, and advanced services, the city abandoned its traditional identity as an industrial center. After 1992, following the Olympics and the international success the city enjoyed as a result, Barcelona became a "model" city, renowned for its architecture, urban projects, attention to urban morphology, and context. Through extensive "in the field" investigation, giving voice to key figures in culture, architecture, and politics, and

a vast array of images, the author gives a critical account of the various "stages" in Barcelona's recent history, putting them into historical context and drawing parallels with local and international currents.

## 评论

基本资料很详细，缺点是对于大事件的过分关注和分析略显流于表面。

-----  
安排了一趟巴塞羅那五天的旅行，這本書能基本給個對城市發展歷史的框架性理解

-----  
简要梳理了巴塞罗那70年代以来的城市规划建设经验，总体框架很清晰，具体项目分析和操作模式仅是点到为止，没说清楚
