出版时间:2010-10-26

装帧:Paperback

isbn:9780452296541

"An accessible and engaging exploration of the mysteries of time."

-Brian Greene, author of The Elegant Universe

Twenty years ago, Stephen Hawking tried to explain time by understanding the Big Bang. Now, Sean Carroll says we need to be more ambitious. One of the leading theoretical physicists of his generation, Carroll delivers a dazzling and paradigm-shifting theory of time's arrow that embraces subjects from entropy to quantum mechanics to time travel to information theory and the meaning of life.

From Eternity to Here is no less than the next step toward understanding how we came to exist, and a fantastically approachable read that will appeal to a broad audience of armchair physicists, and anyone who ponders the nature of our world.

作者介绍:

Sean Carroll is a theoretical physicist at Caltech who has won fellowships from the Sloan and Packard foundations, NASA, and the National Science Foundation. He lives in Los Angeles with his wife, writer Jennifer Ouellette.
