装帧:Hardcover

isbn:9781907621031

A Jules Verne world of extraordinary visions and contraptions as portrayed by the top 30 artists in the genre Steampunk is a resurgent art, cult, and lowbrow movement celebrating the romantic elegance of the Victorian era and blending in modern

scientific advances—synthesizing imaginative technologies such as steam-driven robots, analog supercomputers, and ultramodern dirigibles. Celebrating the elegant and the strange, these visually arresting steampunk works collected here include sculpture, installations, graphics, bizarre oils, and mind-warping contraptions—from skull cameras to rocket-fuelled diving bells.

挺美的一本书，前50页是蒸朋发展史（主要是文学上的），后面全是世界各地的蒸朋艺术家的绘图和手工艺品展示。才知道倡导DIY和废物利用也是蒸朋的理念之一。

维多利亚时期的工业庞克，喜欢的不得了

Please fasten your seatbelts and get ready for the book.
