Helliconia is a planet that, due to the massively eccentric orbit of its own sun around another star, experiences seasons that lasts eons. Whole civilisations grow in the Spring, flourish in the Summer and then die in the brutal winters. The human-like inhabitants have been profoundly changed by their experience of this harsh cycle. In orbit above the planet a terran mission struggles to observe and understand the effects on society of such a massive climatic impact. Massive, thoroughly researched, minutely organised, full of action, pulp references and deep drama this is a classic trilogy.

评论

翻译完了，还没出。冷门的经典，融入了很多思考，但故事的格局跟美式科幻完全不同。走的是主流文学的路子。当译者被虐最严重的一套书，呕心沥血啊。对市场前景不敢有什么乐观预期。
