We live in the era of the geek. Computer nerds are our titans of industry; comic-book

heroes are our Hollywood idols; the Internet is our night on the town. Clearly, the geeks know something that other folks don't - something we'd all do well to learn from. So here it is: "Geek Wisdom", painstakingly gathered and interpreted by a diverse team of hardcore nerds who've spent years poring over the most beloved texts of the modern-day imagination. Beginning with close to 200 of the most powerful and oft-cited quotes from movies (Do, or do not - there is no try), television (The truth is out there), comics (With great power comes great responsibility), science, the Internet, and more, "Geek Wisdom" offers illuminating insights into the eternal truths to be found therein. Yes, this collection of mini-essays is by, for, and about geeks - but it's just so surprisingly profound, the rest of us would have to be dorks not to read it.
