出版时间:1995-9

装帧:Hardcover

isbn:9789810221683

By the Kobayashi-Hitchin correspondence, the authors of this book mean the isomorphy of the moduli spaces Mst of stable holomorphic - MHE of irreducible Hermitian-Einstein - structures in a differentiable complex vector bundle on a compact complex manifold. They give a complete proof of this result in the most general setting, and treat several applications and some new examples.
