出版时间:2012-3-9

装帧:Paperback

isbn:9781934356906

In *Programming Your Home*, technology enthusiast Mike Riley walks you through a variety of custom home automation projects, ranging from a phone application that alerts you to package deliveries at your front door to an electronic guard dog that will prevent unwanted visitors. Open locked doors using your smartphone. Assemble a bird feeder that posts Twitter tweets to tell you when the birds are feeding or when bird

seed runs low. Have your home speak to you when you receive email or tell you about important events such as the arrival of visitors, and much more! Using Android smartphones, Arduinos, X10 controllers and a wide array of sensors, servos, programming languages, web frameworks and mobile SDK's, Programming Your Home is written for smartphone programmers, web developers, technology tinkerers and anyone who enjoys building cutting-edge Do It Yourself electronic projects. This book will give you the inspiration and understanding to construct amazing automation capabilities that will transform your residence into the smartest home in your neighborhood! *What You Need:* To get the most out of Programming Your Home, readers should have some familiarity with the Arduino hardware platform along with a passion for tinkering. They should enjoy innovative thinking and learning exercises as well as have some practical application development experience. The projects use a variety of hardware components including sensors and actuators, mobile devices, and wireless radios, and we'll even tell you where you can get them.

评论

粗略读过，非常有趣。

类似cookbook的书，通过一个个实用的例子来介绍如何去做，对于我这样的超级初学者来说非常有用

amazing!

书中的例子很好,讲解很到位
