作者介绍:

Giulio Bai is a law student living in Italy who spends most of his time toying with stuff that doesn't have anything to do with law.

Even after trying to keep the list of his past achievements as short as possible, the number of projects that he joined in (and that invariably sunk shortly thereafter) makes it hard to narrow down his interests to programming and carousels alone.

It should be made clear that any claim of responsibility for those unfortunate ventures is wholeheartedly rejected – they never had the necessary potential to make it anyway.

书评

200来页，前后花了大概8小时左右阅读并实现书中代码。
99%都很顺利，说明1内容通顺易读，2内容太过浅显。
总的来说做入门很好，能大致上把常用的组件用起来。但是书中基本上就是ui的堆积，

事件处理，后台交互接近于没提，也许是为了降低复杂度吧，话说名字真的很贴切。
