著者:Edward O. Wilson

出版者:W. W. Norton & Company

出版时间:2012-4

装帧:Hardcover

isbn:9780871404138

Where did we come from? What are we? Where are we going? In a generational work of clarity and passion, one of our greatest living scientists directly addresses these three fundamental questions of religion, philosophy, and science while "overturning the famous theory that evolution naturally encourages creatures to put family first" (Discover magazine). Refashioning the story of human evolution in a work that is certain to generate headlines, Wilson draws on his remarkable knowledge of biology and social behavior to show that group selection, not kin selection, is the primary driving force of human evolution. He proves that history makes no sense without prehistory, and prehistory makes no sense without biology. Demonstrating that the sources of morality, religion, and the creative arts are fundamentally biological in nature, Wilson presents us with the clearest explanation ever produced as to the origin of the human condition and why it resulted in our domination of the Earth's biosphere.

-----  
Very engaging read. E O Wilson is one of the best science writers today.

-----  
I have been sharing some of my observations/evaluations of the ccp system with my husband and I used EOW's framework to delineate the three-month field trip ; I think it helped him finally understand the madness of the whole apparatus: everything seemed to be in a f\*\*king disarray

-----  
书里提到的生物学和进化学的很多发现很有意思。作者大概要算科学家里面文笔很好的了。

-----  
这本书一直断断续续读了些章节。春节假期终于通读了一遍。写的真不错。力荐，如果你对进化心理学，宗教，人类学，昆虫学感兴趣。
