This book is about animal extinction on the European continent. Readers will learn about the Pliocene and Pleistocene periods of life on Earth. The book discusses animals like the cave bear, the dwarf hippopotamus, the dwarf elephant, the woolly

mammoth, and the woolly rhinoceros. Project Webster represents a new publishing paradigm, allowing disparate content sources to be curated into cohesive, relevant, and informative books. To date, this content has been curated from Wikipedia articles and images under Creative Commons licensing, although as Project Webster continues to increase in scope and dimension, more licensed and public domain content is being added. We believe books such as this represent a new and exciting lexicon in the sharing of human knowledge.
