The Anthropology of Welfare provides an overview of what anthropology has to offer welfare studies and vice-versa. Case studies from anthropologists in the field, examine

different branches of welfare and community care, for example: * Maternity services * Children with learning difficulties * Children's homes * Mothers' centres * People with HIV * Mental health centres * Housing * Care and provision for the elderly. Contributors focus on comparative welfare systems - examples are taken from urban and rural areas of the UK, USA, Sweden, Germany, Portugal, and New Zealand. In each case the theoretical and methodological appropriateness of social anthropology for the study of welfare, and the insights gained by bringing anthropology and welfare together are examined. The Anthropology of Welfare will be essential reading for those studying anthropology, social work and social policy and will be of interest to teachers, practitioners and researchers in applied social welfare fields.
