Puzzled by your PC? Mad at your Macintosh? Tired of technology in general? You're not alone! Even since the HAL 9000, computers have been the gadgets everyone loves to hate. David Lubar brings you a wide-ranging collection full of off-the-mark predictions, bad advice, world-class put-downs, and even occasional words of praise from the"experts" in the field--everyone from Steve Jobs and Thomas J. Watson, Jr. to Woody Allen and George Bush. The perfect gift for anyone who's ever loved or loathed their computer! 0201483041B04062001
