This book celebrates established icons, newly discovered gems and contemporary masterworks that represent the highest expression of Scandinavian design and response to their environment. Fifty projects are featured in detail, ordered according to the way in which different light conditions have imparted particular qualities on the buildings. Henry Plummer treats his subject from a uniquely authoritative perspective in which his words resonate directly with his artfully taken images. Books that give a true sense of the magical light that have shaped great buildings are rare: this is a

publication to savour. Nine chapters present established icons, newly discovered gems and contemporary masterworks, according to the way in which different light conditions have imparted particular qualities to buildings. Among the buildings featured are Arne Jacobsens town hall in Arhus, Denmark, Alvar Aaltos Villa Mairea in Finland, Klas Anshelms Malmo Konsthall in Sweden, and many others. Each chapter features an introduction, which traces the nature, quality and cultural history of that aspect of light.

太！好！看！了！必须推荐！！！图片质量非常好！主要是Nordic地区的建筑对于光的理解和应用在设计里，从1940年的案例直到2010年前后，教堂及博物馆，及少量图书馆办公楼etc。芬兰有好多美丽的教堂啊啊啊！！！以及Utzon的BAGSVAERD教堂实在太oriental了~~~以及因为在intro部分提到了光的波粒二向性，这本书必须深得我心~~

美翻

极简主义教堂们太美了吧！
