Perkovic's Introduction to Programming Using Python provides an imperative-first introduction to Python focusing on computer applications and the process of developing them. The text helps develop computational thinking skills by covering patterns of how problems can be broken down and constructively solved to produce

an algorithmic solution. The approach is hands-on and problem oriented. The book also introduces a subset of the Python language early on to help write small functions. Chapters include an introduction to problem solving techniques and classical algorithms, problem-solving and programming and ways to apply core skills to application development.

学校的老师写的，写得比较有趣，让我这样的都对编程产生兴趣了。后天考试了，怕怕
…

是商学院开设的计算机入门课程的课本。读起来通俗易懂。但是列题略微简单，和老师上课给的列子比起来难度不是一个等级的
